## Outraged over liquor sales proposal

Once again we are being subjected to the effort of the liquor lobby to increase sales of alcohol products.

It is outrageous for the big corporate grocery store chains to become venders of a product that results in drun driving deaths, domestic home problems, alcohol syndrome births, and the list is endless to the track record

of the misery to society that consumption of this product has caused.

We should contact our senator and representative and tell them to turn down the grocery industry's attempt to persuade our state legislature to allow increased sale of alcoholic products in our grocery stores:
